

RECALL PRO

Qasim and Imran

ABOUT US

At recall pro, we are working to optimise proactive, individualised patient care by harnessing the power of digital technology and intelligent systems.

PROBLEM

INCREASING DATA, INCREASING COMPLEXITY

The complexity of managing an ageing population with increasing multimorbidity is increasing exponentially.

CURRENT PROCESSES ARE NOT FIT FOR PURPOSE

Current recall systems are:

- Inefficient
- Unreliable
- Exacerbate health inequalities

WORKLOAD

The number of GP practices is falling - 6,495 in 2022 from 8106 in 2013. At the same time the number of appointments increased. This is leading to unsustainable pressure.

SOLUTION

END TO END FLOW MANAGEMENT

Recall pro manages all parts of the recall loop, minimising unnecessary work for all members of the team

INDIVIDUALISED

Messaging can be targeted to audience such as language and condition specific

INTEGRATED

Appointment books can link to a number of primary care services allowing for population health approach to service flow

RESPONSIVE

Recognition of the variance in response, preference of communication

PRODUCT OVERVIEW

MVP

Drug monitoring includes more than 1/8 of the list as identified by CQC and MHRA

ACTIVITY

Estimated percentage to automated recall loop – 19%

PRODUCT BENEFITS

UNIQUE

Designed to 'close the loop' in a way that no other product does.

SAFE

Recall is reliable, timely and consistent.

Oversight remains with clinician.

AGILE

Personalised pathways that adapt to the individual improving engagement and empowerment.

COST

Releasing clinician and admin time to focus in areas of greatest need.

COMPANY OVERVIEW

A close-up photograph of a person's hand placing a smooth, dark grey stone onto a stack of four other smooth stones of various colors (brown, tan, grey) on a pebbly beach. The background is a blurred view of the ocean and sky. A white rectangular box with a thin border is overlaid on the upper left portion of the image, containing the text 'BUSINESS MODEL' in white capital letters.

BUSINESS MODEL

RESEARCH

We based our innovation on five decades of clinical and IT experience and market research.

ABSTRACT

Focus on digital process management to realise huge improvements in patient care and clinical resilience.

DESIGN

Co-developed with stakeholders
Agile.

YEAR ACTION PLAN

2023/24

MEET THE TEAM
